

# Eric Hoffmann

3017 White Beech Drive • Harwood, MD 20776

443-223-5679 • ehcomm1@gmail.com • eric-hoffmann.github.io

---

## Education

---

### Bachelor of Science, Computer Engineering

University of Maryland at College Park

A. James Clark School of Engineering

### ACES Cybersecurity Honors Citation

Expected: May 2020

Current GPA: 3.414

2x Dean's List

Expected: May 2018

---

## Activities

---

### Leidos Software Engineering Internship

June 2017 – August 2017

- Collaborated with another intern to create a serverless RESTful web application in JavaScript
- Utilized Amazon Web Services (Lambda, API Gateway, S3), Angularjs, and Nodejs
- Implemented document (docx, pdf, xlsx) and database (DynamoDB) parsing and search
- Setup CI pipeline through AWS Codestar for version control, build, and deployment

### Designing, Building, and Flying Quadcopter Drones

Summer 2015 – Present

- Modeled custom quadcopter frame using Autodesk Inventor
- Set up and printed frame using Makerbot 3D printer
- Diagramed, wired, and soldered connections between electrical components

### ACES Honeypot Project [School Project]

January 2017 – May 2017

- Designed and operated Linux honeypot to find correlation between attacker skill and location
- Created bash and Python scripts to automate management of honeypot

### Parsons-ACES CTF competition, 2<sup>nd</sup> Place

February 10, 2017

- Worked as a team of three to solve various computer/cryptography related puzzles
- Used Wireshark to analyze packet capture files
- Analyzed website source HTML to find clues

### Autonomous Over Sand Vehicle (OSV) [School Project]

September 2016 – December 2016

- Worked with a team to design a four wheeled rover
- Successfully navigated a sandbox with obstacles, found a flame, and extinguished it
- Designed and 3D printed components
- Wrote C++ Arduino code needed to operate motors and sensors
- Designed and wired electrical layout of OSV

### C++ Video Game Design

~Spring 2015

- Utilized Allegro 4.2 game programming library to create multiple small games

### Java Minecraft Video Game Modification

2011 – 2014

- Used Minecraft Coder Pack tool to deobfuscate, modify, and recompile *Minecraft* source code
- Created Bukkit server framework plugins for easier server administrationz

---

## Skills

---

- Programming Languages: C, C++, Java, Python, Javascript, HTML, CSS
- Programs/Frameworks: Git, AWS, Angularjs, Nodejs, Microsoft Office Suite, Wireshark, Autodesk Inventor, NI Multisim
- Other Skills: Unix, Windows, circuit design, soldering, CAD modeling, website design
- Coursework: Discrete Math, Software Reverse Engineering, Digital Circuits, Signals, Particle and Wave Physics, Differential Equations, Calculus, Cybersecurity, Engineering Design
